

## School In A Box

*With technology finding its way to Edu-World, it has become imperative for educational institutions to use latest inventions and stay competitive. Better school administration and management necessitates versatile use of web. This laid foundation stone for the concept of School Management Software- School In A Box.*

*School In A Box is an inclusive school management /school administration software that is designed with a sole intention of supporting schools in effectively managing their school related operations and activities. It is a result of years of research on reducing the management efforts and maximizing efficiency of school management systems. School In A Box has changed the way a school works and administers its day-to-day operations. In simple words, it has simplified the management efforts and emerged as a smart solution for e-age schools.*
